

Myfreight

COMPLEX FREIGHT MADE SIMPLE

ABOUT US

Established in 1991, Myfreight has been helping businesses take control of their freight and logistics for over 25 years.

Originally focusing solely on freight management, Myfreight now owns and operates its own cloud based transport management system (TMS). Myfreight is available as a stand alone system for businesses looking to manage their own freight or is included with Myfreight Premium managed services.

WHY CHOOSE US?

- ✓ Multiple award-winning cloud Transport Management System (TMS)
- ✓ Wholly Australian owned company with more than 25 years experience in freight management
- ✓ Consultative in our approach to provide unique solutions and deliver outstanding results

OUR PRODUCTS

COMPLEX FREIGHT MADE SIMPLE

Myfreight Genius

Our award winning cloud software (Genius) allows you to manage all of your own freight. With our software in the cloud, you can manage your freight from anywhere with an internet connection. Our software is closely supported by our business at all times to ensure you are always benefiting with costs, trends, efficiencies and business performance. Complete with a live analytics dashboard for customised KPI reporting, Myfreight is the perfect software partner to support your supply chain.

Key features:

- Multi carrier lowest cost default
- 100% cloud hosted – No install
- Invoice reconciliation
- Customer service interface

“Initially, we compared Myfreight Genius to the so-called competition. The difference, not just in technology but in attitude to customer satisfaction was vast. I am more than happy to recommend Myfreight Genius to any freight sender” – Mark Forrest, Masport

MyDelivery App

Our driver phone app will manage your own personal vehicles, fleet, or carriers that cannot offer this technology to support your business. No need for Capex for hardware anymore. Our app allows your business and freight handlers to manage your freight better and to improve visibility across your supply chain.

Key features:

- Sign on glass
- GPS location
- POD management
- Asset tracking

Myfreight Premium

Our fully managed freight option. You can rely on our customer service, operations, finance, technical & administration. With ongoing carrier management, carrier labelling, business KPI's and reporting supported by regular analysis. This will allow you to focus on running your business.

Key features:

- Genius software included
- Managed customer service
- Carrier negotiation and management
- Ongoing analysis and reporting

Myfreight Hybrid

Combine the best of both worlds with Genius software and Premium management. Genius software to manage your own preferred vehicles, fleet and carriers and complimented by the Premium option for whatever percentage of your business you require assistance managing with. The Hybrid option delivers proven performance across your supply chain and will assist you driving even further costs, efficiencies and performance.

Key features:

- Retain your key carriers and pricing
- Offset the price of Myfreight Genius
- Ongoing flexibility with your freight
- Take advantage of our buying power

“Freight management for us, requires the flexibility of Myfreight Premium and Genius options. Our business needed a system that was agile and be able to deliver results in a dynamic business, warehouse and logistics environment. Myfreight provides live reporting, alerts and outstanding visibility. Myfreight is the best I have seen!”

– Mark Ramsdale, GM Bunzl Industrial and Safety
